

MissingAttachments

This is a list of all pages on the old Wiki that had attachments.

Please look through the table and add some comments for stuff that you know needs to be kept. I am looking through the attachments archive on the server to find what is vandalism and spam.

The vandalised pages also need to have the attachment links removed. All pages need the links modified for legitimate attachments. So please note when each is done.

If you have an attachment that is really really urgent, then please contact the mailing list. However we would prefer to do them all at once.

Page Name	Attachment filename	Comment	Action	Fix Links
_FileUploadWithAction	blah.txt	junk	deleted	deleted
