

JakartaBoardReport-October2011

Jakarta status report, October 2011. We have included a TLP resolution for Apache JMeter for the board's consideration at this board meeting.

General

This quarter, we reached consensus on the remaining three sub-projects at Jakarta. BSF was moved to Apache Commons, Cactus was moved to Apache Attic and we have a TLP resolution for Apache JMeter for the board's consideration at this meeting. If the board approves the resolution, we will then begin the steps to move JMeter to a TLP and subsequently, the steps to shut down Apache Jakarta.

Community

- New committer: Philippe Mouawad (JMeter)

Releases

- JMeter 2.5.1 - Oct 3rd 2011
- JMeter 2.5 - Aug 17th 2011

Subproject news

BCEL

Moved to Apache Commons last quarter, move has been completed.

BSF

Moved to Apache Commons this quarter, move has been completed.

Cactus

Moved to Apache Attic this quarter, move has been completed.

JCS

Moved to Apache Commons last quarter, move has been completed.

JMeter

Active user list and Bugzilla component. Many bug fixes and improvements this quarter. One new committer this quarter. We have voted to propose JMeter as a TLP this quarter. Released JMeter 2.5.1 on Oct 3rd 2011, 2.5 was released on Aug 17th 2011.
