Issues

1. The Acquiring page on the web site needs to link to the Download page, so that we have one consistent download location.

Outstanding Bug Review

ID	Summary	Component	Prevents Release
30696	Struts-Tiles-JSF-Integration SOMETIMES creates blank pages	Struts-Faces	No
30707	Bottleneck in ActionServlet	Standard Actions	No (FIXED)
30717	MessageResources.java has unsynchronized access to MessageFo	Utilities	No (WONTFIX)
30842	html:link not using page charset encoding (defaults to "UT	Custom Tags	No (Resolved)
30876	While using File Upload, getting ClassCastException when returning from a FormBean /Action Class	File Upload	No (Unconfirmed)
30884	ActionForward constructor for copying existing AFs skip the module property	Controller	No (FIXED)
31025	validwhenparser null pointer exception	Validator	No (FIXED)
31026	validwhen bugs	Validator	No (FIXED)

(craigmc: Note that the struts-faces bugs are not directly relevant to a Struts 1.2.2 release because this library is not included.)

(niallp: I have applied patches for bugs [30707](#) and [30884](#) as it seems like a shame to release with these in. They were marked as later but if anyone objects we could release without them)
