

Click 2.3 Wishlist

1. Ajax Support

I'd like to see improved Ajax support in Click 2.3.0, especially around the area of reusable Ajax controls. It is not currently possible to create such controls.

There are a number of approaches to improve Ajax support, so here is a list of proposals to stimulate further discussion:

[Ajax Proposals](#)

2.Stateful controls

With the [deprecation of stateful](#) pages we need a way to preserve control state across requests.
