

2019-12-11 Apache VCL Board Report

Description:

The mission of the Apache VCL project is to create and maintain of software related to a modular cloud computing platform which dynamically provisions and brokers remote access to compute resources.

Issues:

There are no issues requiring board attention.

Membership Data:

Apache VCL was founded 2012-06-19 (7 years ago)

There are currently 10 committers and 7 PMC members in this project.

The Committer-to-PMC ratio is roughly 5:4.

Community changes, past quarter:

- No new PMC members. Last addition was Aaron Coburn on 2012-06-19.

- No new committers. Last addition was Mike Jennings on 2019-01-04.

Project Activity:

Most of the activity we've had since our 2.5.1 release at the end of July has been related to supporting people upgrading to that release.

Community Health:

We typically have a bit of a lull in development after getting a release out as committers catch up on things they have been putting off while working on the release. We are seeing that now and expect to see things pick back up a bit in the next few months.

We have a good candidate in a recently added committer to become a new PMC member.
