

Using Visitor Field Validator

Description

The followings show a simple example using Webwork's Field Validators

Step 1

Create the jsp page. {snippet:id=visitorValidatorsExample|lang=xml|javadoc=false|url=struts2/apps/showcase/src/main/webapp/WEB-INF/validation/visitorValidatorsExample.jsp}

Step 2

Create the action class. {snippet:id=visitorValidatorsExample|javadoc=false|lang=java|url=struts2/apps/showcase/src/main/java/org/apache/struts2/showcase/validation/VisitorValidatorsExampleAction.java}

Step 3

Create the validator.xml. {snippet:id=visitorValidatorsExample|javadoc=false|lang=xml|url=struts2/apps/showcase/src/main/resources/org/apache/struts2/showcase/validation/VisitorValidatorsExampleAction-submitVisitorValidatorsExamples-validation.xml}
