Booth Tasks and Coverage

Please see below for the list of tasks that we need help with from volunteers. Note that we are also happy to have more than one volunteer on the booth at the same time, so you don't have to be alone.

- The booth does not need to be covered 100% of the time during ApacheCon but it would be good to have people there during the main breaks.
- The aim is to use the booth as a meeting point to connect with others during the conference.
