Tuweni

Tuweni is a set of libraries and other tools to aid development of blockchain and other decentralized software in Java and other JVM languages.

Tuweni has been incubating since 2019-03-25.

Three most important unfinished issues to address before graduating:

1. Finish export notice for cryptographic elements
2. Vote in a few more committers
3. Keep release pace and adoption

Are there any issues that the IPMC or ASF Board need to be aware of?
No issues to report at this time.

How has the community developed since the last report?
We are seeing a few contributions in the bug reports and pull requests offered on the repository. The project is starting to gain good traction.

We have seen adoption of the project downstream and a couple of fixes contributed as direct result.

How has the project developed since the last report?

We voted 1.1.0, with a set of new features.
The roadmap is on Github and more accessible.
The project is also using Github actions to help kick faster CI for pull requests.

How would you assess the podling's maturity?
Please feel free to add your own commentary.
