

February 2021

Tuweni

Tuweni is a set of libraries and other tools to aid development of blockchain and other decentralized software in Java and other JVM languages.

Tuweni has been incubating since 2019-03-25.

Three most important unfinished issues to address before graduating:

1. Increase release pace and adoption
2. Vote in a few more committers
3. Organize outreach

Are there any issues that the IPMC or ASF Board need to be aware of?
No issues to report at this time.

How has the community developed since the last report?
We have pulled through a good set of features and the project is participating in efforts such as the Ethereum Enterprise Alliance, a non-profit.

We have had a very small outreach effort building on publishing our docs on the website ; more drumbeating required.

How has the project developed since the last report?

We voted 1.3.0. 1.4.0 is under vote.
We are working on a working Ethereum client now.

How would you assess the podling's maturity?
Please feel free to add your own commentary.

- [X] Initial setup
- [X] Working towards first release
- [X] Community building
- [] Nearing graduation
- [] Other:

Date of last release:

2020-11-27

When were the last committers or PPMC members elected?
Danno Ferrin as committer on 2020-06-08.

Have your mentors been helpful and responsive?
1.4.0 is having a hard time getting past initial vote.
We will submit it to PPMC soon.

Is the PPMC managing the podling's brand / trademarks?
Yes. At present, there are no issues nor concerns with the Tuweni mark.
We do not anticipate any issues with the mark regarding graduation.
