About MRUnit

MRUnit is testing framework for testing MapReduce programs written for running in Hadoop ecosystem. MRUnit makes testing Mapper and Reducer classes easier.

For more information please see <http://mrunit.apache.org>.

How to use

```
<dependency>
  <groupId>org.apache.mrunit</groupId>
  <artifactId>mrunit</artifactId>
  <version>0.9.0-incubating</version>
  <classifier>hadoop2</classifier>
</dependency>
```

Where classifier is either hadoop1 or hadoop2 whichever matches the major version of hadoop you are using.
