Apache

MINA

is a network application framework which helps users develop high performance and high scalability network applications easily. It provides an abstract -event-driven - asynchronous API over various transports such as TCP/IP and UDP/IP via Java NIO.

Apache MINA is often called:

- NIO framework - library,
- client - server framework - library, or
- a networking - socket library.

However, it's much more than that. Please take a look around the list of the [features](#) that enable rapid network application development, and [what people says about MINA](#). Please grab yourself a [download](#), try our [Quick Start Guide](#), surf our [FAQ](#) or start join us on [our community](#)

[MINA 2.0.7 released](#)

[Emmanuel Lécharny](#) posted on Oct 10, 2012

The Apache MINA project is pleased to announce MINA 2.0.7 ! This version is a bug fix release. It fixes a regression introduced in MINA 2.0.5, and some performance improvements for the UDP server. We recommend all users to upgrade to this release. We consider this a stable and production ready release. Change log DIRMINA-645 - SslFilter should start initiating handshake from sessionCreated() rather than from onPostAdd()

[MINA 2.0.5 released](#)

[Emmanuel Lécharny](#) posted on Aug 26, 2012

The Apache MINA project is pleased to announce MINA 2.0.5 ! This version is a bug fix release. We recommend all users to upgrade to this release. We consider this a stable and production ready release. Release note <https://issues.apache.org/jira/secure/ReleaseNote.jspa?projectId=10670&version=12316474>

[Apache FtpServer 1.0.6 released](#)

[Niklas Gustavsson](#) posted on Jul 16, 2011

The Apache MINA project is pleased to announce the release of FtpServer 1.0.6. This release fixes a bunch of issues found since the release of 1.0.5, including a major improvement in how FtpServer handles assignment of passive ports. We recommend all users to upgrade to this release and consider this a stable and production ready release. Release notes <https://issues.apache.org/jira/browse/FTPSERVER/fixforversion/12315314> Downloads <http://mina.apache.org/ftpserver/downloads....>
