

OpenOffice Domains

After checking a few random entries here, all these domains seem to exist on one physical server.

Categories

On <http://projects.openoffice.org/> project categories are defined. Let's use these unless another organization makes sense. We'll map these to short names.

1. Product Development - Core
2. Extension Development - Extension
3. Language Support - Language
4. Helping Users - Users
5. Distribution - Infra
6. Promotion - Community

We should note which projects have downloadable webcontent and which redirect to the [openoffice wiki](#).

Accepted Projects

OOo Project Name	Project Website Name	Category	Hosted at	Notes
About	http://about.openoffice.org/	Community	Kenai	About, history, trademarks, testimonials, ...

Extensions	http://extensions.services.openoffice.org/	Extension	OSUOSL	Access and download extensions.
Contributing	http://contributing.openoffice.org/	Community	Kenai	Contribution Portal

Native-Lang Projects

The following language codes appear to have websites (complete with domain registration one would assume). More complete information about these sites can be found at <http://projects.openoffice.org/native-lang.html>.

All of the site names are of the form: xx.openoffice.org. These are NOT housed on the main openoffice.org server.
