OOo-to-ASF-site-recommendation

Main (Existing) Web Site (openoffice.org)

Current main navigation areas:

1. why: Why use OpenOffice.org
2. download: Direct download specific product only
3. support: Support area (many alternatives!)
4. extensions: get extensions (housed at OSU)
5. participating: catch-all for all kinds of particiaption
6. news (top navigation bar): news, manually edited
7. download: Complete download page (user, developer version, other information)
8. projects (top navgiation bar): a complete listing of all projects
9. people: registered OO.o participants (needed for mailing list activity, etc.)
10. my page (participant login)
11. about: a page about the project

New Site Recommendations (in discussion)

Overview

1. Primary restructuring based on "users" vs "developers"
2. User focused areas would remain on a server designated as: openoffice.org
3. Native-language areas would remain with the "language".openoffice.org specification
4. Developer areas would be assigned to: openoffice.apache.org.

Migration Specifics (more discussion needed)

Accepted Projects

OOo Project Name	Project Website Name	Category	Currently Hosted at	Notes	Migration Recommendations
About	http://about.openoffice.org/	Community	Kenai	About, history, trademarks, testimonials, ...	A single page -- not a project. URL can be removed but content must be moved to "new" openoffice.org/about.html or something, don't delete the project's history.
API	http://api.openoffice.org/	Core	Kenai	APIs, UNO, SDK, ...	Move, delete or combine information with what's in development.openoffice.org. Redirect this URL to "new" development.openoffice.org. Maybe separate wiki topic?
Application Framework	http://framework.openoffice.org/	Core	Kenai	Core modules.	Move, delete or combine information with what's in development.openoffice.org. Redirect this URL to "new" development.openoffice.org. Maybe separate wiki topic?
Bibliographic	http://bibliographic.openoffice.org/	Language	Kenai	Managing references, metadata, MODS, RDF	Not sure what's going on with this one. Some info at: OO.o Developer wiki/Bibliographic (/http://wiki.services.openoffice.org/wiki/Bibliographic/Developer_Page)
Council	http://council.openoffice.org/	Community	Kenai	Council and steering committee - including the council wiki.	Obsoleted by current ASF project. Need a URL direct to new main project site?
Database Access	http://dba.openoffice.org/	Core	Kenai	OOo Base Application	Move, delete or combine information with what's in development.openoffice.org. Redirect this URL to "new" development.openoffice.org. Maybe separate wiki topic?
Development	http://development.openoffice.org/	Community	Kenai	Developer Portal - Development	Umbrella site for all development.
Documentation	http://documentation.openoffice.org/	Users	Kenai	User Guides, Documentation	Do we have consensus on this one? Post "official docs" to "new " documentation.openoffice.org? Direct everything else (i.e. we need links to) to the wiki?
Download	http://download.openoffice.org/	Infra	Kenai	Downloads, RC, Beta, and Developer Builds	Complete site and move as is except for updating.
External	http://external.openoffice.org/	Extension	Kenai	"hosts source code related to OpenOffice.org that is exempted from the general copyright and/or licensing rules. Sources may fall under licenses different from those used by the OpenOffice.org core codebase. These sources are not covered by the Oracle Contributor Agreement and thus copyright is not shared with Oracle."	Not sure about this one. maybe move and house with Extensions?
Graphics Applications	http://graphics.openoffice.org/	Core	Kenai	Graphic Support, Draw, Impress, Chart 2, Drawing and Presentation Layers	Move, delete or combine information with what's in development.openoffice.org. Redirect this URL to "new" development.openoffice.org. Maybe separate wiki topic?
Graphic System Layer	http://gsl.openoffice.org/	Core	Kenai	Device dependent graphics, printing support.	Move, delete or combine information with what's in development.openoffice.org. Redirect this URL to "new" development.openoffice.org. Maybe separate wiki topic?

Infrastructure	http://infrastructure.openoffice.org/	Infra	Kenai	OOo Website	Pertains to old site. No need to move but may (?) need a redirect (?)
Installation	http://installation.openoffice.org/	Infra	Kenai	Installers and Packaging	Check on this one. Maybe superseded with something else? OO.O Building Guide?
Lingucomponent	http://lingucomponent.openoffice.org/	Languages	Kenai	Dictionaries - Spelling, Hyphenation, Thesaurus, and Grammar	Probably more useful to move to wiki with a link from "download" to current dictionaries, other components.
Localization	http://l10n.openoffice.org/	Languages	Kenai	Localization and internationalization	Active project. Presence on both main web site -- page, mailing lists -- and wiki. Migrate and redirect URL. This project might need a separate ASF mailing list within OO.o.
Marketing	http://marketing.openoffice.org/	Community	Kenai	Marketing portal	Migrate main site and redirect URL. They can set up easier access for some areas via the wiki.
Porting	http://porting.openoffice.org/	Infra	Kenai	Adding support for new Operating Systems	Possibly incorporate into normal development umbrella? Need feedback form project manager.
QA	http://qa.openoffice.org/	Infra	Kenai	Issue tracker frontend	Migrate as separate project and redirect URL.
Spreadsheet	http://sc.openoffice.org/	Core	Kenai	Calc application	Move, delete or combine information with what's in development.openoffice.org. Redirect this URL to "new" development.openoffice.org. Maybe separate wiki topic?
Tools	http://tools.openoffice.org//	Infra	Kenai	Build tools and repository	Delete -- OUTDATED and no longer list as a project in "official" list. Info superseded by http://wiki.services.openoffice.org/wiki/Documentation/Building_Guide
Universal Content Broker	http://ucb.openoffice.org/	Extension	Kenai	Configuration settings and specifications	??? not sure about this one. Why Extension and not Core?
UNO Development Kit	http://udk.openoffice.org/	Core	Kenai	Scripting framework and bridges to other language like PyUNO	Move, delete or combine information with what's in development.openoffice.org. Redirect this URL to "new" development.openoffice.org. Maybe separate wiki topic?
User Experience	http://ux.openoffice.org/	Core	Kenai	To develop and improve usability and look & feel of OOo	Most information already on wiki. Need to migrate main site page to wiki as a front page? Active mailing list.
User Interface	http://ui.openoffice.org/	Core	Kenai	Improved on create better user experience and interface and usability	Important client aspects. Move, delete or combine information with what's in development.openoffice.org. Redirect this URL to "new" development.openoffice.org. Definitely needs a separate topic and tie-in to User Experience.
Website	~~http://website.openoffice.org/~~ http://www.openoffice.org/	Community	Kenai	The entry point of the OOo websites	Main site. Needs a URL redirect. Probably some editing.
Writer	http://sw.openoffice.org/	Core	Kenai	Web and Writer application as well as printing	Move, delete or combine information with what's in development.openoffice.org. Redirect this URL to "new" development.openoffice.org. Maybe separate wiki topic?
XML File Formats	http://xml.openoffice.org/	Core	Kenai	File format, transformations, export to other fileformats	Move, delete or combine information with what's in development.openoffice.org. Redirect this URL to "new" development.openoffice.org. Maybe separate wiki topic?

Incubator Projects ("Topics")

OO Project Name	Project Website Name	Category	Hosted at	Notes	Migration Recommendations
BizDev	http://bizdev.openoffice.org/	Community	Kenai	Relationship with companies and OOo service providers	Not sure if this project is still active in any way. Possibly delete.
Certification	http://certification.openoffice.org/	Community	Kenai	Competence certification for OOo	Also questionable and may not fit with new Apache philosophy.
Groupware	http://groupware.openoffice.org/	Core	Kenai	Project to try to extent OOo towards a groupware solution	No activity, can discard.
Distribution, incl. CDROM, mirrors and P2P	http://distribution.openoffice.org/	Infra	Kenai	DVD, CDROM, BitTorrent distribution of OOo	Currently, CD-ROM and P2P have their own URLs, merging needs to happen here
Education	http://education.openoffice.org/	Users	Kenai	Development education and host of the OOo4Kids project	Needs complete conversion and re-routing or move to wiki.
Extensions	http://extensions.services.openoffice.org/	Extension	OSUOSL	Development of extensions and administration of the Extension Repository	Needs complete conversion and own website. Not sure why it's still incubator within OpenOffice
Modularizaton	http://modularization.openoffice.org/				Move to wiki or merge with development?
ODF@WWW	http://odf-at-www.openoffice.org/	Core	Kenai	Project to make it easy for ODF to integrate to the web	
OOPM	http://oopm.openoffice.org/	Core	Kenai	Development of OOo Project Management module	Need a status update on this one. Still active?
Performance	http://performance.openoffice.org/	Core	Kenai	Project focused on OOo performace optimization	Still an active project?
Security	http://security.openoffice.org/	Core	Kenai	Project to improve the security in every corner of OOo	Still active or just migrate to security team?

Stats	http://stats.openoffice.org	Infra	Kenai	Track OOo site traffic, commits, list traffics, and other numbers	Will be superseded by something else. Can delete.
Uniform Office Format	http://uof.openoffice.org/	Core	Kenai	Interoperability with the UOF file format	Probably move to wiki.
VBA Interoperability	http://vba.openoffice.org/	Core	Kenai	Interoperability with VBA macros	Moved to OO.O wiki. Not active as a web site.
WP	http://wp.openoffice.org/	Core	Kenai	Wordpress filter	Move into development or its own wiki section.

Native Language Projects

See complete listing at http://projects.openoffice.org/native-lang.html . Due to commit approval process at main Apache OpenOffice incubator site, recommend all native language "start" pages be moved to new Apache OpenOffice wiki environment.

Public/User Site ("new" openoffice.org)

Setup Issues

Q. Where will this domain actually "live" and who will manage access?
A. User facing web site will reside at http://incubator.apache.org/openofficeorg/www/ . Current www.openoffice.org will redirect to http://incubator.apache.org/openofficeorg/www/.
Q. How will this sites be accessed/updated?
A. Web site will require commit status and svn access.

Content Management

Q. Once a new "site" is determined, what content tools (cms, standard headers/footers, server-side include templates, etc.) are available and who can access them?
A. The new site will use the Apache CMS and Django style headers used by the CMS. All django style templates and programming are stored in the "templates" folder. See http://www.apache.org/dev/cms.html and http://www.apache.org/dev/cmsref.html and local instructions [http://incubator.apache.org/openofficeorg/website-local.html | http://incubator.apache.org/openofficeorg/website-local.html].
Q.Can existing content can be ported over?
A.yes.
Q. And if so, how and who will do it?
A. Existing web content MUST be ported over using svn by Apache committers. Anyone can do this but appropriate discussion is mandatory. It might be wise to designate specific areas to certain individuals.

Content Migration

Keep the following /pages areas with some editing as needed:

- why
- about (doesn't need to be a separate "site")
- download
- support (scale down this page...highlight forums and documentation)
- participate/contribute
- extensions
- native-lang pages

Project/Developer Site (openoffice.apache.org)

Questions

Q. Where will this domain actually "live" and who will manage access?
A. Main portion of development web site will reside at http://incubator.apache.org/openofficeorg/ . URL openoffice.apache.org will redirect to http://incubator.apache.org/openofficeorg/.
Q. How will this sites be accessed/updated?
A. Web site will require commit status and svn access.
Q. What to do about "non-product development" projects?
A. – not available yet –
Q. Should the developer arm take over direct involvement with the "mirrors" and "distribution" projects?
A. – not available yet –

-- to be continued --

Other Sites/Services (especially OO.o wiki and extensions)
