

# Website Template (Old)

this content is obsolete, some parts may be more or less correct.

Header - `<div id="banner">`

Left - `<div id="site">`

- openoffice.org - OpenOffice.org logo using the R followed by the vertical bar and a title - I think the bar and title should be black and not white.
- apache.org - A version of OOo logo like Drew's that includes the words Apache along with an **incubating** notice.

Right - `<div id="usersearch">`

- user login and account creation - Wiki and Forums
- search boxes.
- Language project link.

Top Navigation Bar - `<div id="topnav">`

- Navigation tabs - varies as now but with some changes.

Content - `<div id="pagebody">`

This section only applies to the content in the Apache CMS. The MediaWiki and the User Forums add their own content.

Navigation - `<div id="navigation">`

- Bookmark Navigation

Change to allow `contents/${project}/sidenav.mdtext` to override `templates/sidenav.mdtext` for markup within the `contents/${project}` directory and its subdirectories.

Center - `<div id="content">`

- Content area contains the page markup.

Footer - `<div id="footer">`

Bottom Navigation Bar - `<div id="bottomnav">`

- Contact Us link.
- Privacy Policy link.
- Copyrights link.
- Terms of Use link.

For each link there should be a page for openoffice.org and a page for the project site. These pages are not in a wiki. They are in the project's svn repository.

Left - `<div id="apachelogo">`

- The Apache incubator logo.

Center - `<div id="legalnotices">`

- Trademark statement.
- Copyright statement.

Right - `<div id="poweredby">`

- MediaWiki - powered by MediaWiki logo.
- Forum - phpBB logo - <http://www.phpbb.com/about/logos/>
- Project SVN - Apache feather logo.
