

MyFaces Commons Components

MyFaces Commons Components contains non renderkit specific components and code that can be used with any jsf frameworks. It includes:

- mc:renderOne : A component that only renders the first child either by index or the first visible one.
- mc:outputClientId : Output the clientId of a component specified by for property.
- mc:exporterActionListener : very simple export to pdf or xls action listener.

And some facelet EL functions that comes in handy writing html/javascript/css mixtures:

- `UIComponent findComponent(java.lang.String)`
- `UIComponent findComponentFrom(javax.faces.component.UIComponent, java.lang.String)`
- `java.lang.String outputClientId(java.lang.String)`
