Release Checklist and steps once a release is approved.

Pre-release

- Ensure the line endings are correct (svn-eof)
- Confirm that the README file is up to date
- Update the DIFFS or CHANGES file to reflect the changes that release has
- Ensure that JIRA issues are tagged and marked correctly in the issue tracker for the particular release
- Use RAT to ensure apache license is in all files
- Ensure that documentation is up-to-date
- Ensure the source release matches the svn tag
- Ensure the hashes and signatures of the ZIPs are correct
- Confirm source distribution is buildable and passes all tests
- The notice file should contain the following lines ONLY:

Apache Lucene.Net
Copyright 2006-2012 The Apache Software Foundation

This product includes software developed by
The Apache Software Foundation (http://www.apache.org/).
