Requirements and Ideas

Ideas

- Propagate and enforce OfBiz permissions, roles and users to JCR
- Expose the JCR part via WebDAV (and/or some RESTish service)
- ~~JCR contents shall always be revisioned~~
- Prevent duplication of properties between OfBiz and JCR
- Explore Content Addressable Storage CAS options to prevent duplicate contents
- Use this opportunity to create a simple workflow for OfBiz CMS Contents (or externalize to a CMS that provides a workflow)
