

Sostenuto

0.6 (July 7th, 2011)

With great pleasure and pride we announce the availability of the new 0.6 Syncope rolling release **Sostenuto**, (check it on [the roadmap](#)).

In a nutshell the most important new features:

1. Virtual Schema management [#20](#)
2. Schema mapping for derived attributes [#27](#)
3. Support for Enum schema [#66](#)
4. Search user by associated resource [#112](#)
5. REST service for getting running version [#115](#)
6. Use JNDI Datasource (when available) in ContentLoader [#124](#)
7. Use HSQldb 2.2.4 [#126](#)

Alongside with these new features, some bugfixes are also coming:

1. [#79](#)
2. [#80](#)
3. [#110](#)
4. [#111](#)
5. [#114](#)
6. [#116](#)
7. [#118](#)
8. [#119](#)
9. [#122](#)
10. [#123](#)

As you can check on [getting started page](#), the maven archetype has also been updated to reflect all the changes described above.
