

struts-default.vm

If Velocity is being use, the `struts-default.vm` supplies some VelocityMacros that might be useful.

struts-default.vm

```
#macro(bean $bean_name $name)
  #set ($name = $action.bean($bean_name))
#end

#macro(includeservlet $name)
  $action.include($name,$req,$res)
#end

#macro(url $name)
  #set ($name = $action.bean("org.apache.struts.util.URLBean"))
  $name.setRequest($req)
  $name.setResponse($res)
#end

#macro(property $object $property)
  ${ognl.findValue($property, $object)}
#end
```
