

Administration

The following are a series of articles discussing all the administration related tasks. In order to perform those tasks you will require knowing the tools provided by Apache Geronimo. These articles explain in detail all the tools and commands available for administering the Apache Geronimo server.

The available articles are:

- [Administrative tasks](#)
 - [Administering applications](#)
 - [Installing and removing applications](#)
 - [Starting and stopping application modules](#)
 - [Administering the Apache Geronimo Server](#)
 - [Adding new listeners for the Web containers](#)
 - [Add new AJP listener](#)
 - [Add new HTTP listener](#)
 - [Add new HTTPS listener](#)
 - [Configure log level](#)
 - [Derby Log Viewer](#)
 - [Log Manager](#)
 - [Server Log Viewer](#)
 - [Web Access Log Viewer](#)
 - [Configuring a remote Apache HTTP server](#)
 - [Configure Apache HTTPd as a reverse proxy \(mod_proxy\)](#)
 - [Configure Apache HTTPd with Jakarta Tomcat Connector \(mod_jk\)](#)
 - [Configuring the JMS server](#)
 - [Display JVM information](#)
