9. 1.0.1-incubating (August 30th, 2012)
10. 1.0.0-incubating (August 7th, 2012)
11. 1.0.0-RC3-incubating (July 18th, 2012)
12. 1.0.0-RC2-incubating (June 25th, 2012)
13. 1.0.0-RC1-incubating (June 1st, 2012)

1.0.9 (April 11th, 2014)

This release contains a security fix for [CVE-2014-0111](#), upgrade from previous 1.0.X versions is strongly suggested.

Bug

- [\[SYNCOPE-364\]](#) - Rejected users are anyway propagate to associated resources

1.0.8 (April 18th, 2013)

Release Notes - Syncope - Version 1.0.8

Bug

- [\[SYNCOPE-351\]](#) - Errors when editing role membership assignment in notifications (About and Recipients)

Improvement

- [\[SYNCOPE-348\]](#) - Email address validator regexp

Wish

- [\[SYNCOPE-340\]](#) - Translate items of Syncope UI and config files labels for Portuguese language

1.0.7 (March 26th, 2013)

Release Notes - Syncope - Version 1.0.7

Bug

- [\[SYNCOPE-332\]](#) - User List sorting via Derived attributes column doesn't work
- [\[SYNCOPE-336\]](#) - Use a auto-complete textfield to chose for external attribute to be mapped during schema mapping creation
- [\[SYNCOPE-339\]](#) - enum schema multivalued doesn't work
- [\[SYNCOPE-341\]](#) - When deleting user schema, user list attributes head don't get updated
- [\[SYNCOPE-342\]](#) - Console might fail to connect when core is deployed on virtual host

Task

- [\[SYNCOPE-326\]](#) - Check console style (CSS) on Internet Explorer

1.0.6 (February 27th, 2013)

Release Notes - Syncope - Version 1.0.6

Bug

- [SYNCOPE-294 (<https://issues.apache.org/jira/browse/SYNCOPE-294>)] - User data not refreshed before edit
- [SYNCOPE-301 (<https://issues.apache.org/jira/browse/SYNCOPE-301>)] - Status is not updated when synchronizing existing users
- [SYNCOPE-307 (<https://issues.apache.org/jira/browse/SYNCOPE-307>)] - Virtual Attributes don't propagated in case of update during synchronization
- [SYNCOPE-308 (<https://issues.apache.org/jira/browse/SYNCOPE-308>)] - When trying to update an user in status 'rejected', an error 500 is returned
- [SYNCOPE-309 (<https://issues.apache.org/jira/browse/SYNCOPE-309>)] - Enter key not bound to user form submit
- [SYNCOPE-310 (<https://issues.apache.org/jira/browse/SYNCOPE-310>)] - Palette elements get translated
- [SYNCOPE-314 (<https://issues.apache.org/jira/browse/SYNCOPE-314>)] - User list sort based on username fails
- [SYNCOPE-315 (<https://issues.apache.org/jira/browse/SYNCOPE-315>)] - "Persistent" feedback messages
- [SYNCOPE-316 (<https://issues.apache.org/jira/browse/SYNCOPE-316>)] - Exception when creating connector instances with no bundles available
- [SYNCOPE-325 (<https://issues.apache.org/jira/browse/SYNCOPE-325>)] - Stacktrace when accessing the Configuration page on JBoss

Improvement

- [SYNCOPE-154] - Virtual attribute cache
- [SYNCOPE-299] - Add "row to display"; selector in resources
- [SYNCOPE-311] - View user details during approval

1.0.5 (January 23rd, 2013)

Welcome to the first release of 2013.

Bug

- [SYNCOPE-260] - Update propagation with null virtual attribute values
- [SYNCOPE-267] - Possible NullPointerException into SchemaMappingUtil.getAccountldValue()
- [SYNCOPE-269] - AES encryption key defined in source code
- [SYNCOPE-272] - During sync null attributes from template are considered
- [SYNCOPE-273] - Role deletion inhibits notification update
- [SYNCOPE-274] - Sync: during update with user template existing memberships break update

Improvement

- [SYNCOPE-14] - Solve some warnings and verify if generated projects still work
- [SYNCOPE-67] - Display all Execute Tasks (Propagation, Notification and Scheduled) and related Execution history items sorted in descending order
- [SYNCOPE-201] - AbstractSchema enumeration/Values and enumerationKeys too short
- [SYNCOPE-255] - Hide Global Password/Account/Sync policy in security resource selections
- [SYNCOPE-263] - Inject Recipient and Event variable in Velocity Email Notification Template
- [SYNCOPE-264] - Email Notification Templates Documentation
- [SYNCOPE-266] - Password should be provided again at resource subscription time if a "Password" schema mapping for that resource exists
- [SYNCOPE-279] - Connector instance timeout
- [SYNCOPE-283] - website edits

1.0.4 (December 10th, 2012)

This is the first release after being established as Top-Level Project., fourth maintenance release from the 1_0_X branch.

Bug

- [SYNCOPE-232] - "Connection is read-only" during initialization
- [SYNCOPE-233] - Authentication failure using password with special characters
- [SYNCOPE-234] - Failures upgrading OpenJPA
- [SYNCOPE-235] - CSVDir connector fails during check connection
- [SYNCOPE-236] - Username and password not evaluated from user template during synchronization
- [SYNCOPE-237] - Users with no entitlements cannot edit their own profile via console
- [SYNCOPE-238] - With an high number of users, the admin console's 'TODO' tab is extremely slow
- [SYNCOPE-240] - Missed CREATE status into org.apache.syncope.console.commons.StatusUtils.Status

Improvement

- [SYNCOPE-239] - Add OSGi support for the client
- [SYNCOPE-243] - Extended org.apache.rat exclude list for eclipse IDE

1.0.3-incubating (October 30th, 2012)

This is the third maintenance release for 1.0.X-incubating.

Bug

- [\[SYNCOPE-214\]](#) - Error when trying to change readonly attribute
- [\[SYNCOPE-217\]](#) - SyncopeUser.hasTokenExpired() can easily cause nullpointer exception
- [\[SYNCOPE-220\]](#) - When running in embedded mode, CSVDir configuration shows unresolved \$urlencode.csvdir.path property
- [\[SYNCOPE-224\]](#) - ActivitiWorkflowLoader called by SpringContextInitializer even when ActivitiUserWorkflowAdapter is not selected
- [\[SYNCOPE-226\]](#) - Invalid passwords might fill up user's password history
- [\[SYNCOPE-228\]](#) - When updating a role, assigned entitlements get lost
- [\[SYNCOPE-230\]](#) - Sync user attributes using a long schema attribute as accountId

1.0.2-incubating (October 2nd, 2012)

This is the second maintenance release for 1.0.X-incubating.

Bug

- [\[SYNCOPE-193\]](#) - LDAP test connector status management does not work with synchronization
- [\[SYNCOPE-194\]](#) - User attributes not synchronized properly from LDAP resource
- [\[SYNCOPE-196\]](#) - Change Display Attributes button misaligned
- [\[SYNCOPE-202\]](#) - MySQL and Oracle integration test hangs
- [\[SYNCOPE-208\]](#) - Resources: schema mapping form shows incorrect external field names for SyncopeUserId and Password
- [\[SYNCOPE-211\]](#) - Test org.apache.syncope.core.persistence.relationships.derAttrFromSpecialAttrs not enabled

Improvement

- [\[SYNCOPE-124\]](#) - Prevent task execution request for running tasks
- [\[SYNCOPE-195\]](#) - Make default sorting order consistent
- [\[SYNCOPE-200\]](#) - Improve rat-plugin configuration
- [\[SYNCOPE-207\]](#) - Clear test configuration in order to avoid AccountId/Password mapping explicitly valued

1.0.1-incubating (August 30th, 2012)

This is a maintenance release after the 1.0.0-incubating.

Bug

- [\[SYNCOPE-183\]](#) - 'Enforce mandatory constraints' not working
- [\[SYNCOPE-187\]](#) - When deleting an user, REST error doesn't bring error message to display
- [\[SYNCOPE-191\]](#) - UI Error when sorting Synchronization Task executions
- [\[SYNCOPE-182\]](#) - LICENSE & NOTICE: duplicated entries
- [\[SYNCOPE-192\]](#) - With trace level NONE notification tasks don't get updated
- [\[SYNCOPE-185\]](#) - Could not delete an user with LDAP resource

Improvement

- [\[SYNCOPE-184\]](#) - LDAP test connector should provide status information

Task

- [\[SYNCOPE-188\]](#) - Upgrade to Apache Wicket 1.5.8

1.0.0-incubating (August 7th, 2012)

After 7 months of work the Apache Syncope team is proud to announce the final release of the first stable version since entering the Apache Incubator. This release took a bit more than expected because the team had to get familiar with new ASF procedures and toolset; now engines are warmed up and ready for upcoming features.

This release essentially adds bugfixes over features, improvements and bugfixes introduced by the 3 RC releases reported below.

Enjoy Apache Syncope Espresso!

Bug

- [\[SYNCOPE-114\]](#) - Cannot edit an existing reportlet
- [\[SYNCOPE-113\]](#) - Adding schema mapping to new resource requires changing connector
- [\[SYNCOPE-115\]](#) - Spring warns about 'Ambiguous write methods found' for HttpClientParams
- [\[SYNCOPE-118\]](#) - User list: 'propagationTOs' shouldn't be shown for display attributes
- [\[SYNCOPE-117\]](#) - Empty default user list display attributes selection
- [\[SYNCOPE-178\]](#) - Incomplete processing during synchronization / full reconciliation
- [\[SYNCOPE-179\]](#) - Synchronization task executions not connected to owning task
- [\[SYNCOPE-180\]](#) - After test execution spare files aren't all cleaned up
- [\[SYNCOPE-181\]](#) - Missing entries in LICENSE & NOTICE for JQuery and CodeMirror

Improvement

- [\[SYNCOPE-116\]](#) - Display execution date on Task and Report lists

1.0.0-RC3-incubating (July 18th, 2012)

It's time for a new release. More details below.

Bug

- [\[SYNCOPE-101\]](#) - Release process creates three source artifacts
- [\[SYNCOPE-102\]](#) - Concurrent execution of the same report might lead to inconsistencies
- [\[SYNCOPE-103\]](#) - Export function in console not working
- [\[SYNCOPE-104\]](#) - UTF-8 characters do not appear in notification mails
- [\[SYNCOPE-106\]](#) - User search based on Enum attribute doesn't work
- [\[SYNCOPE-108\]](#) - Wrong de-provisioning in case of different role with the same external resource
- [\[SYNCOPE-111\]](#) - Failure during role attribute propagation
- [\[SYNCOPE-112\]](#) - Resource test connection doesn't work fine

New Feature

- [\[SYNCOPE-105\]](#) - Support Oracle WebLogic

Task

- [\[SYNCOPE-109\]](#) - Support JBoss AS 7.1 with native OpenJPA

1.0.0-RC2-incubating (June 25th, 2012)

It's time for a new release, approaching closely to 1.0.0-incubating. More details below.

Bug

- [\[SYNCOPE-83\]](#) - Recipients tab has all fields required when editing NotificationTask
- [\[SYNCOPE-90\]](#) - GenerateToken class doesn't persist token to DB
- [\[SYNCOPE-92\]](#) - Align parent POM version to latest release
- [\[SYNCOPE-94\]](#) - When upgrading to HttpComponents Client 4.2, an Integration Test fails
- [\[SYNCOPE-95\]](#) - Search doesn't work at all with production content.xml
- [\[SYNCOPE-96\]](#) - Invalid authentication
- [\[SYNCOPE-97\]](#) - Singleton RestTemplate
- [\[SYNCOPE-99\]](#) - Problem editing notifications through console when Membership included in about

Improvement

- [\[SYNCOPE-73\]](#) - Add staging site generation steps to release-process page
- [\[SYNCOPE-74\]](#) - Make configuration params available in mail templates
- [\[SYNCOPE-76\]](#) - Manage connector configuration property confidential
- [\[SYNCOPE-88\]](#) - Support MS SQL Server
- [\[SYNCOPE-89\]](#) - ReportTestITCase.executeAndExport hangs with oracle
- [\[SYNCOPE-91\]](#) - More UserController RESTful method consistency
- [\[SYNCOPE-98\]](#) - Method to check if token has expired

1.0.0-RC1-incubating (June 1st, 2012)

This is the very first ASF release, introducing a high number of new features and fixing tons of bugs. More details below.

Sub-task

- [SYNCOPE-5] - Report configuration UI
- [SYNCOPE-6] - Add Selenium test case for Report

Bug

- [SYNCOPE-1] - ASF license headers not correct
- [SYNCOPE-3] - Include NOTICE and LICENSE in all artifacts
- [SYNCOPE-8] - ERROR: type "clob" does not exist
- [SYNCOPE-10] - ConnInstance update doesn't imply related connector spring beans reloading
- [SYNCOPE-11] - Editing a virtual attribute, error after submit
- [SYNCOPE-12] - Error Selenium Tests
- [SYNCOPE-16] - Update propagation fails in case of virtual attributes
- [SYNCOPE-17] - Manage ConnID's configuration exception
- [SYNCOPE-18] - Virtual attributes cannot be mapped as AccountId
- [SYNCOPE-21] - ACT_HI_ACTINST:Unique index or primary key violation on non-empty database
- [SYNCOPE-23] - TODO tab glitches
- [SYNCOPE-27] - Reflection aware REST methods don't consider classes not explicitly implementing interfaces
- [SYNCOPE-29] - Deployment on JBoss AS 7.1.0-Final does not work
- [SYNCOPE-30] - Generation from archetype fails with error 'The defined artifact is not an archetype'
- [SYNCOPE-31] - User status is not propagated during update
- [SYNCOPE-32] - Missing SMALLINT type in ImportExport class
- [SYNCOPE-33] - Virtual attribute missing during synchronization
- [SYNCOPE-34] - No propagation fo virtual attributes retrieved/generated during synchronization
- [SYNCOPE-36] - User read fails in case of error during virtual attribute retrieving
- [SYNCOPE-37] - Using console, create a new report feature does not work.
- [SYNCOPE-39] - Notification task is not created during synchronization
- [SYNCOPE-40] - Notification task error: small field size (htmlbody and txtbody)
- [SYNCOPE-41] - NotificationManager: extend email.schema to derived and virtual attributes
- [SYNCOPE-43] - Report does not keep a reference to its executions for a new report
- [SYNCOPE-46] - Error: Search from console with LIKE condition
- [SYNCOPE-47] - User resource set update fails during synchronization
- [SYNCOPE-48] - Incorrect entitlement inheritance
- [SYNCOPE-49] - Make utility maps returned by TO's methods read-only
- [SYNCOPE-52] - Recipient search does not work
- [SYNCOPE-54] - Notification e-mails can be sent forever
- [SYNCOPE-58] - User request approval duplicates requests
- [SYNCOPE-61] - WARNING: DB connection abandoned
- [SYNCOPE-63] - PolicyBeanPanel doesn't work fine
- [SYNCOPE-65] - Export/Import doesn't work with MySQL
- [SYNCOPE-68] - Existing memberships removed during synchronization
- [SYNCOPE-70] - Source artifacts include either 'syncope-1.0.0-RC1-incubating-source' and 'syncope-root-1.0.0-RC1-incubating-source' root dirs
- [SYNCOPE-71] - Foreign key constraints missed with OpenJPA
- [SYNCOPE-72] - JSP files don't contain the required ASF license header
- [SYNCOPE-75] - User create fails providing more than one value for a multivalued attribute of type date
- [SYNCOPE-77] - Save button not displayed in MembershipModalPage
- [SYNCOPE-80] - Changin Rows to display value in Propagation Tasks does not take effect
- [SYNCOPE-81] - NotificationTasks cannot be deleted
- [SYNCOPE-82] - Propagation task executions don't get persisted
- [SYNCOPE-84] - Projects generated with maven artifacts fail because of missing legal files
- [SYNCOPE-86] - TaskExec instances are not associated with owning NotificationTask
- [SYNCOPE-90] - GenerateToken class doesn't persist token to DB

Improvement

- [SYNCOPE-14] - Solve some warnings and verify if generated projects still work
- [SYNCOPE-22] - Improve virtual attribute value retrieving
- [SYNCOPE-24] - Remove code replication managing resource schema mappings
- [SYNCOPE-28] - SyncJobActions interface improvement
- [SYNCOPE-38] - Todo icon is different compared to other icons.
- [SYNCOPE-42] - Add the ability to delete a user by username via the REST API
- [SYNCOPE-45] - Make all delete operations consistent in the REST API
- [SYNCOPE-50] - Cache custom implementation classes
- [SYNCOPE-53] - Make the whole UserTO object available in mail templates
- [SYNCOPE-55] - Allow users to read roles assigned to them by membership
- [SYNCOPE-60] - Display Executions in Synhronization Tasks with descendent order as default
- [SYNCOPE-62] - Improve enum schema by giving the possibility to specify labels
- [SYNCOPE-67] - Display all Execute Tasks (Propagation, Notification and Scheduled) and related Execution history items sorted in descending order
- [SYNCOPE-69] - Increase compile performance
- [SYNCOPE-85] - Replace dependency on openjpa-all
- [SYNCOPE-91] - More UserController RESTful method consistency

New Feature

- [\[SYNCOPE-7\]](#) - Role/Membership attributes propagation

Task

- [\[SYNCOPE-2\]](#) - Fix NOTICE and LICENSE content
- [\[SYNCOPE-4\]](#) - Report features
- [\[SYNCOPE-9\]](#) - Update logo in console web UI
- [\[SYNCOPE-13\]](#) - Migrate documentation from old wiki
- [\[SYNCOPE-19\]](#) - Update Activiti to release 5.9
- [\[SYNCOPE-20\]](#) - Audit features
- [\[SYNCOPE-25\]](#) - Update glassfish-it profile to latest glassfish 3.1.2
- [\[SYNCOPE-35\]](#) - Update to Wicket 1.5.5 and verify selenium tests
- [\[SYNCOPE-56\]](#) - Package rename
- [\[SYNCOPE-64\]](#) - Issues fixed since last non-ASF release (0.7.1)
- [\[SYNCOPE-66\]](#) - Add source distribution sub-module
