

CloudStack Weekly News

Project news for Apache CloudStack (incubating).

Contributing to the Apache CloudStack Weekly News

If you have an event, discussion, or other item to contribute to the *Weekly News*, you can add it directly to the [wiki](#) by editing the issue you want your item to appear in. (The next week's issue is created before the current issue is published - so at any time there should be at least one issue ready to edit.) Alternatively, you can send to the dev@cloudstack.apache.org mailing list with a subject including **NEWS: *description of topic*** or email the newsletter editor directly ([jjb at apache.org](mailto:jjb@apache.org)), again with the subject **NEWS: *description of topic***. **Please include a link to the discussion in the mailing list archive or Web page with details of the event, etc.**
