

AOO4.1 - Installation

Low priority/No work needs to be focused on the 4.1 cycle on the installer. Minor changes for consistency sake.

Installation is important because this is the software equivalent to an un-boxing. This is the user's first impression!

Many commercial products use the installation wizard to promote products and their features. Luckily AOO installs pretty quick so the user won't be spending time here!

But on the wizard screens we would need to update the branding so that it clean, crispy and consistent with branding. Done!

Installation Artifacts

	4.0.1	Proposed 4.1	Comment
Set Up Icon		No Change	Excellent Icon
Unpacker		Not gonna cry but the logo is not consistent. - Samer Low Priority	Inconsistent with branding.
Unpack Directory		No Changes	
Installer		Not gonna cry but the logo is not consistent. - Samer Low Priority	Inconsistent with branding.
