## Board Report (August 2013)

### Description

Apache CouchDB is a database that uses JSON for documents, JavaScript for MapReduce queries, and regular HTTP for an API.

### Releases

- 1.3.1 (27 June 2013)
  - <http://www.apache.org/dist/couchdb/notes/1.3.1/apache-couchdb-1.3.1.html>

### Recent Activity

- Support added for latest Erlang/OTP releases.
- Preparation for 1.4.0 release cycle has begun.
- Work is underway to document an official project vision.
- Work is underway to release in Cloudant's Fauxton overhaul of the CouchDB admin interface.
- Work is underway to merge in Cloudant's BigCouch fork which will add clustering capabilities to CouchDB.
- Work is underway to merge in parts of Benoît Chesneau's rcouch fork which improves the build system, refactored internal applications, and additional user-facing functionality such as bonjour/zeroconf awareness, global db changes feeds, replications and changes feeds across views.
- Work is underway on a plugin system, with early results already shared with the community.
- Cloudant announced the BigCouch merge, generating lots of press activity.
- Cloudant hosted a CouchDB booth and CouchDB party at OSCON.
- Cloudant are organising 'Apache CouchDB Conf, Vancouver' on November 13th, 2013 (in line with ASF branding and CouchDB PMC cooperation).

Our GitHub comment notifications have not been set up yet, due to lack of progress with necessary infrastructure tasks.

### Community

Including the following additions, CouchDB has 28 committers and 9 PMC members.

New committers:

- Dirk Ochtman
- Sue 'deathbear' Lockwood

No new PMC members.
