Status Report - February 2015

```
DESCRIPTION

Apache Flume is a distributed, reliable, and available system for
efficiently collecting, aggregating, and moving large amounts of log
data to scalable data storage systems such as Apache Hadoop's HDFS.
RELEASES

* The last release of Flume was version 1.5.2, released on November
18, 2014.
* Initial discussions around an incremental release version 1.6.0
are currently underway.

CURRENT ACTIVITY

* A total of 80 issues have been filed, and 33 issues have been
resolved between the period starting November 4, 2014 and February 4,
2015.
* Approximately 1095 messages were exchanged on the dev list in the
past three months, while a total of 282 were exchanged on the user
list in this period.

COMMUNITY

* The last time a new committer was added to the project was on
September 24, 2013.
* The last time a new PMC member was elected for the project was
on November 4, 2014.
* The current PMC affiliations are: Apple (2), Cloudera (9),
CyberAgent (1), Data Fueled (1), Hortonworks (1), Nextiva (1),
ScalingData (1), StreamSets (1), Vanderbilt
University (1), Zymergen (1), Not Specified (2)
* Currently there are:
- Total of 263 subscribers to the developer list
- Total of 617 subscribers to the user list
- Total of 24 committers
- Total of 21 PMC members

ISSUES

* There are no issues requiring board attention at this time.
