Mailing Lists

The following mailing lists are available. Before posting you might want to read the Support page before posting to the mailing list.

Mailing Lists

> ⓘ **Use Camel User List**
>
> You should post and subscriber to the **Camel User List** for all your questions on using Camel, or how to do X with Camel etc. If in doubt use this list.
> The other list Camel Developer List, is for the Camel team to discus development of the actual Camel project; do **not** use this list for question on using Camel.
> Again to re-iterate, use the **Camel User List**, for you Camel questions. This is the correct mailing list, and have the most people there ready for helping you.

> ⊘ **Post plain text mails**
>
> When posting to the mailing lists, use plain text mails. Do **not** use HTML mails. HTML mails is more likely to be targeted as spam mails and will be rejected; as well it's not easily readable by others.

List Name	Address	Subscribe	Unsubscribe	Archive	Nabble (Online Forums)	Comment
