

Board Report (2016-05)

Apache ACE is a software distribution framework that allows you to centrally manage and distribute modular software components, configuration data and other artifacts to OSGi based and related target systems.

Releases:

- * February 9th, 2016: ACE 2.1.0 release.

Statistics:

- * Last committers added: February 26th, 2016
- * Last PMC members added: June 18th, 2013
- * Mailing list activity (dev+users) for last 3 (jan-apr) months: 69 msgs
(previous 3 months: 40 msgs)
- * Commits for last 4 (jan-apr) months: 130
(previous 3 months: 0)

Activity:

- * Did a new release, addressing lots of smaller issues in 2.0.1.
- * We added a new committer, Bram Pouwelse.
- * Engaged with the community to find out what their issues are with ACE and tried to address those going forward.
- * jawi and marris did a presentation about ACE at the ApacheCon NA in Vancouver just now.

Notes:

We missed the report deadline last month, which is why we are now reporting about a 4 month period;
