

# Apache Geronimo v1.0 - User's Guide

This page is an attempt to organize and consolidate all the documentation for Apache Geronimo. There is a list of topics to be covered and the discussion about the content is being carried on the developers mailing list [dev@geronimo.apache.org](mailto:dev@geronimo.apache.org), for subscription information refer to the [Mailing Lists](#) at the Apache Geronimo Web site.

The following is a proposed table of contents to address as many topics as possible on Apache Geronimo. This structure should be the foundation for upcoming releases of Geronimo. This is a work in progress and collaboratively constructed through the Apache Geronimo community, **your contributions to this documentation are welcome**, this is a community effort.

1. [Quick start - Apache Geronimo for the impatient](#)
  - [Getting the software](#)
  - [Start the server](#)
  - [Create and deploy a sample application](#)
2. [Apache Geronimo project overview](#)
  - [About Apache Software Foundation \(ASF\)](#)
  - [Technology Compatibility Kit \(TCK\)](#)
3. [Architecture](#)
  - [Apache Geronimo overview](#)
  - [GBeans overview](#)
  - [Specs Layout](#)
4. [Administration](#)
  - [Tools and commands](#)
  - [Geronimo Administration Console](#)
  - [Administrative tasks](#)
    - [Administering the Apache Geronimo Server](#)
    - [Configuring Services](#)
    - [Configuring DB2 Datasource](#)
    - [Administering applications](#)
    - [Administering Security](#)
  - [Configuring Geronimo as a Windows Service](#)
  - [Running Geronimo as a non root user](#)
5. [Sample applications](#)
6. [Deployment](#)
  - [Deployer tool](#)
  - [Hot deployment](#)
  - [Deployment plans](#)
  - [Deploying secure applications \(Security\)](#)
7. [Security](#)
  - [Security concepts](#)
  - [Login into Geronimo](#)
  - [Geronimo and JAAS](#)
  - [JaasLoginService API Discussion](#)
  - [Component Configuration](#)
  - [Authorization - mapping J2EE roles to Principals](#)
  - [Security Definition Schema](#)
  - [Geronimo Login Config Schema](#)
  - [Deploying secure applications](#)
  - [Available login modules](#)
    - [Configuring LDAP](#)
  - [Mapping J2EE Roles in M5 release](#)
8. [Integrating A Third Party JMS Provider](#)
9. [Migrating to Apache Geronimo](#)
  - [J2G Migration Tool](#)
    - [Using J2G](#)
    - [Building J2G from source](#)
  - [JBoss to Geronimo - Servlets and JSPs Migration](#)
  - [JBoss to Geronimo - JDBC Migration](#)
  - [JBoss to Geronimo - Security Migration](#)
  - [JBoss to Geronimo - JCA Migration](#)
  - [JBoss to Geronimo - Web Services Migration](#)
  - [JBoss to Geronimo - EJB-BMP Migration](#)
  - [JBoss to Geronimo - EJB-MDB Migration](#)
  - [JBoss to Geronimo - EJB-Session Beans Migration](#)
  - [JBoss to Geronimo - EJB-CMP Migration](#)
  - [JBoss to Geronimo - Hibernate Migration](#)
10. [Performance and high availability](#)
  - [Remote HTTPd Server](#)
  - [Clustering \(Release independent\)](#)
11. [Troubleshooting](#)
