Apache Geronimo v2.0.2 - Released

2007-10-19

The Apache Geronimo project is pleased to announce the new v2.0.2 release. This release represents the latest open source Java Enterprise Edition 5.0 application server from the Apache Geronimo project, and continues the evolution of the Apache Geronimo server by adding new features and capabilities to a fully compliant and certified Java Enterprise Edition 5.0 container suitable for everything from a development environment to enterprise-level deployments.

Significant changes in this release include MEJB security, new default JNDI names for EJB's, Updated CA Helper application and numerous bud fixes. See the RELEASE-NOTES-2.0.2.TXT for further details.
