

# Upgrade Our Apache Hackathon!

This idea was born out of [Benjamin Young's Upgrading Our Apache](#) talk (see [slides](#)) at ApacheCon NA 2016. The hope is to create an opportunity to get interested developers together to take practical action and/or begin contributing to these projects.

Monday, May 15<sup>th</sup>, 2017 @ ApacheCon NA 2017

**Vision:** improved tools all the places!

**Mission:** bring more activity and developers to projects that need them.

**Goals:**

- increase contribution to the many ASF "self-focused" projects (PonyMail, Phonebook, etc)
- find areas where contributors want more tooling (wiki-access request, cross-project navigation "widget", etc)

**Potential Projects:**

- Community Website
- Phonebook
- projects.apache.org
- PonyMail
- mod\_mbox
- ...and?
