

Official Apache Camel chat room on Gitter

The Camel PMC recently created an [apache-camel chat room](#) on the Gitter instant messaging platform.

Gitter is popular among developers and many open source projects have a room there, so it's only natural that we also have a room there for Apache Camel.

If you are unfamiliar with Gitter you can learn about it from Wikipedia: <https://en.wikipedia.org/wiki/Gitter>

The link to the Apache Camel chat room is: <https://gitter.im/apache/apache-camel>

On behalf of the Camel PMC,
Claus Ibsen
