

# File Upload Interceptor

 See [this page](#) for more examples and advanced configuration

Error formatting macro: snippet: java.lang.NullPointerException

## Parameters

Error formatting macro: snippet: java.lang.NullPointerException

## Extending the Interceptor

Error formatting macro: snippet: java.lang.NullPointerException

## Examples

### Example action mapping:

Error formatting macro: snippet: java.lang.NullPointerException

Notice the interceptor configuration in the preceding example.

### Example JSP form tags:

Error formatting macro: snippet: java.lang.NullPointerException

### Example Action class:

Error formatting macro: snippet: java.lang.NullPointerException

### Setting parameters example:

```
<interceptor-ref name="fileUpload">
    <param name="allowedTypes">
        image/png,image/gif,image/jpeg
    </param>
</interceptor-ref>
```

This part is optional and would be done in place of the `<interceptor-ref name="fileUpload"/>` line in the action mapping example above.
