

Bigtop 1.2.1 Known Issues

Installable binary artifacts

- Currently only x86 repos are available on the shelf. See [Installable binary artifacts](#).
- Kafka artifacts are removed due to Facebook BSD+Patents license banned by Apache. See <https://s.apache.org/vsiT> for more details.

Bigtop Puppet

- There are a few components not working properly under certain Distro. See <https://ci.bigtop.apache.org/view/Provisioner/job/Bigtop-1.2.1-deployments/> for more details.

Security

- Bigtop Toolchain might download Maven, Gradle, and Groovy insecurely. Make sure your images are not tempered.
- This issue will be fixed in up coming Bigtop 1.3.0 release. See the following JIRAs:

-  [BIGTOP-3036](#) - Download gradle and groovy via TLS and do signature checking on ant RESOLVED
-  [BIGTOP-3037](#) - Download maven securely RESOLVED
