

Svn19ApiReview

Svn19ApiReview

This page contains a list of all the new additions to the public Subversion 1.9-dev API.

Needs Review

All public API headers have been reviewed at least once.

Reviewed But Need Further Attention

svn_ra_svn.h

- `svn_ra_svn_create_conn4` — The `@note` is unclear. Is the file being used for time-out detection?

svn_wc.h

- `svn_wc_notify_move_broken` — Has a TODO left-over from 1.8
 - `svn_wc_conflict_description2_t.merged_file` — Clarify the `###`.
-

Review Completed!

All issues found so far have been resolved for these headers:

- `svn_client.h`
- `svn_diff.h`
- `svn_fs.h`
- `svn_repos.h`
- `svn_types.h`
- `svn_dirent_uri.h`

These headers have been reviewed by stefan2 and where issues have been found, they are already fixed. More review is welcome.

- `mod_dav_svn.h`
- `svn_cmdline.h`
- `svn_config.h`
- `svn_error.h`
- `svn_io.h`
- `svn_mergeinfo.h`
- `svn_ra.h`
- `svn_string.h`
- `svn_version.h`

The following 1.9 header contain only minor changes against 1.8. Those changes seem to be o.k. Reviewed by stefan2.

- `svn_auth.h`
- `svn_compat.h`
- `svn_cache_config.h`
- `svn_checksum.h`
- `svn_delta.h`
- `svn_error_codes.h`
- `svn_hash.h`
- `svn_iter.h`
- `svn_opt.h`
- `svn_path.h`
- `svn_sorts.h`
- `svn_xml.h`
