# Related Projects and Tools

**(sorted alphabetically by project's name)**

| Project | Url | Description |
|---------|-----|-------------|
| AppFuse Light | https://appfuse-light.dev.java.net/ | Maven archetype for web apps based on Hibernate, iBATIS, JDO (JPOX), OJB, Spring JDBC. |
| Brix CMS | http://code.google.com/p/brix-cms/ | CMS based on Java Content Repository (JSR-170) |
| Databinder | http://databinder.net/ | Project for building web applications quickly with Wicket and Hibernate. (No longer maintained?) |
| Grails | http://www.grails.org/ | Groovy based Rails-like RAD environment based on Spring and Hibernate. Can be used with Wicket. |
| Iolite | http://wicketstuff.org/confluence/display /STUFFWIKI/Wicket-Iolite | Maven archetype for Wicket+JPA+Spring. |
| Leg Up | http://jWeekend.com/dev/LegUp | A Wicket component that helps getting started quickly with Wicket, Spring, Guice, JPA, Warp, EclipseLink, Hibernate, Scala, JEE ... projects |
| Mistletoe | http://mistletoe.qos.ch/ | Mistletoe is a junit extension intended for integration testing. In technical terms, mistletoe is a junit test suite runner presenting the test results via HTTP as a web-page. |
| OPS4J / Pax Wicket | http://wiki.ops4j.org/confluence/display/ops4j /Pax+Wicket | OSGi service for supporting the creation of Wicket applications running on the OSGi platform |
| Qwicket | http://qwicket.sf.net | another quickstart project for building spring+hibernate+wicket applications. Support for more persistence layers is forthcoming. |
| Shades | http://shadesdb.sourceforge.net | Interface based Object/Relational Mapping (ORM) framework. The address book example has an example of integration with Wicket. Blog. |
| Terracotta | http://www.terracotta.org | is a JVM level clustering solution. Explicit support for Wicket is planned for their next version. Meanwhile, there is a short WIKI article here. |
| Webby | http://r8fe.net/webby | Webby aims at supporting quick creation of data centric web applications, built upon Wicket, using a bean descriptor like approach. blog |
| Wicket Bench | http://www.laughingpanda.org/mediawiki/index. php/Wicket_Bench | Eclipse plugin by Laughing Panda |
| Wicket Bits | http://wicketbits.aezix.com | Collection of wicket related components including Automagic |
| Wicket DnD | http://github.com/svenmeier/wicket-dnd | Wicket Drag and Drop framework |
| Wicket Box | http://github.com/svenmeier/wicket-box | Wicket behaviors for dynamic layouts and resizing |
| Wicket Stuff | http://wicketstuff.org | Sandbox for various wicket components that are not in the wicket core (ex: hibernate, rss, scriptaculous integration) |
| Wicket RAD | http://sites.google.com/site/wicketrad/ | Rapid development of CRUD apps. Features an Open Session In View implementation for JPA, Bean form based on annotations, and a sortable pageable table generator. |
| Wicket Support | http://plugins.netbeans.org/PluginPortal/faces /PluginDetailPage.jsp?pluginid=3586 | NetBeans plugin |
| Wicket Tools | http://www.wickettools.org/index.php | is intended to be a community site with tutorials, projects that extend the functionality of wicket, and show cases of what others have done with wicket. (f.e. ExtJs Integration) |
| Wicket Web Beans | http://code.google.com/p/wicket-web-beans/ | is a project that automatically generates AJAX-based forms at runtime from POJOs. You write the model, WWB does the UI. |
| Wicketopia | http://wicketopia.sourceforge.net/wicketopia /index.html | Maven archetype for DDD apps based on JPA or Hibernate, Spring and DomDriDes. |
