

Juneau 7.2.0 documentation preview

Juneau 7.2.0 is close to release but there is still a considerable amount of documentation to be written. The Javadocs on the classes themselves should be mostly complete, but much remains to be written in the overview document.

I've uploaded a preview of the Javadocs so far here:

http://juneau.apache.org/site/apidocs_preview/index.html

To help identify new and in-progress documentation, I've added temporary color coding to new and modified sections...

11.	ReaderResource
12.	StreamResource
13.	Redirect
14.	@RestMethod.matchers()
15.	Helper Beans
16.	Predefined Throwables
7.	OpenAPI Schema Part Parsing
8.	OpenAPI Schema Part Serializing
9.	HTTP-Part Annotations
1.	@Body
2.	@FormData
3.	@HasFormData
4.	@Query
5.	@HasQuery
6.	@Header
7.	@Path
8.	RequestBean
9.	@Response
10.	@ResponseHeader
11.	@ResponseStatus
12.	@ResponseStatuses
10.	Handling Form Posts
11.	Handling Multi-Part Form Posts
12.	Serializers
13.	Part Serializers
14.	Parsers

If there is any documentation lacking, now would be a good time to point it out 😊
