

2nd Donation: List of Modules to Review

Start by reading all of this for background: [List of Modules to Review](#).

Please add a licenseinfo.xml instead of adding files to the rat-exclusion.txt. (e.g. see [xsl/licenseinfo.xml](#))

- .json (e.g. [#677](#))
- example files (see [#679 comment](#), [licneseinfo.xml](#))

Module clusters in the 2nd donation:

- enterprise (this contains integration with enterprise Java, i.e., Jakarta EE)
- ergonomics (see <http://wiki.netbeans.org/FitnessForever>)
- groovy
- php
- webcommon (this contains integration with Web technologies, such as Cordova, JavaScript, Selenium)

The modules are organized in tables below based on the cluster they belong to.
