

File Upload Interceptor

See [this page](#) for more examples and advanced configuration

Error formatting macro: snippet: java.lang.NullPointerException

Parameters

Error formatting macro: snippet: java.lang.NullPointerException

Extending the Interceptor

Error formatting macro: snippet: java.lang.NullPointerException

Examples

Example action mapping:

Error formatting macro: snippet: java.lang.NullPointerException

Notice the interceptor configuration in the preceding example.

Example JSP form tags:

Error formatting macro: snippet: java.lang.NullPointerException

Error formatting macro: snippet: java.lang.NullPointerException

Example Action class:

Error formatting macro: snippet: java.lang.NullPointerException

Setting parameters example:

```
<interceptor-ref name="fileUpload">
  <param name="allowedTypes">
    image/png,image/gif,image/jpeg
  </param>
</interceptor-ref>
```

This part is optional and would be done in place of the `<interceptor-ref name="fileUpload"/>` line in the action mapping example above.
