

Upgrade to Juneau 7.2.0

There's one integration test failing after upgrading to Juneau 7.2.0

org.apache.streams.twitter.test.api.TwitterIT.testRetweeterIds

Relevant code in

org.apache.streams.twitter.api.Statuses

<http://streams.apache.org/streams-contrib/streams-provider-twitter/apidocs/index.html>

```
@RemoteInterface(path = "https://api.twitter.com/1.1/statuses")
public interface Statuses {

    // This the call that's failing
    @RemoteMethod(method = "GET", path = "/retweeters/ids.json")
    public RetweeterIdsResponse retweeterIds( @Query(name = "**", skipIfEmpty = true) RetweeterIdsRequest
parameters);

    // This call accesses very similar data - it succeeds
    @RemoteMethod(method = "GET", path = "/retweets/{id}")
    public List<Tweet> retweets( @Request RetweetsRequest parameters);

    // This call is almost identical in terms of how the method annotated - it succeeds
    @RemoteMethod(method = "GET", path = "/user_timeline.json")
    public List<Tweet> userTimeline( @Query(name = "**", skipIfEmpty = true) StatusesUserTimelineRequest
parameters);
}
```

Here are the logs I see on the failing test

```
java.lang.RuntimeException: org.apache.juneau.rest.client.RestCallException: HTTP method 'GET' call to
'https://api.twitter.com:443/1.1/statuses/retweeters%2Fids.json?id=1049134195354865665' caused response code
'404, Not Found'.
